

Venetian Republic

Venice, Palazzo Ducale, 27 February 2023

Prot. N. DPL202327020006

Ministries of the Environment, Transport, Energy, Communications, Cultural Heritage and Activities and Tourism.

Proposal for a law by the Ministers of the Environment, Transport, Energy, Communications, Cultural Heritage and Activities and Tourism.

By approval of the Council of Ministers

By approval of the Parliament.

The Law takes into balanced consideration the three dimensions of sustainable development - economic, social and ecological - and aims to end poverty, fight against inequality, tackle climate change, build peaceful societies that respect the human rights.

The Law requires a strong involvement of all components of society, from private companies to the public sector, from civil society to information and culture operators, for Sustainable Development for people, the planet and prosperity.

The Veneto State is called to commit itself to defining its own development strategy that allows it to achieve the objectives set for Sustainable Development for people, the planet and prosperity, communicating the results achieved within a process coordinated by the UN.

The National Strategy for Sustainable Development is based on a multidimensional approach to overcome economic, environmental and social inequalities and thus pursue sustainable, balanced and inclusive development. This approach implies the use of a wide range of instruments, including fiscal policies and structural reforms.

Production is envisaged that safeguards natural environments and biodiversity, in balance with the ecological digital transition, as it is necessary to protect, conserve and manage natural resources and biological diversity in a sustainable way, as prerequisites for the development and prosperity of current and future generations.

The implementation and application of environmental legislation is foreseen, in relation to an efficient use of resources, for the sustainability of consumption and production in respect of the environment, tourism and biodiversity.

For the purposes of environmental assessments on environmental protection for more efficient territorial and international cooperation, it is proposed to establish by law, within the Ministry of the Environment, the Water and Woods Magistrate, assisted by the institution of the Body of Environmental Police.

The Council of Ministers of the Veneto State is available for a bilateral discussion table with the aim of deepening a fruitful cooperation with the Italian State, on the topics mentioned above.

Ministers of the Environment, Transport, Energy, Communications, Cultural Heritage Activities and Tourism.
